

Financial Controller

About Perfuzze

Perfuzze is a growth stage medical device company, based in Galway, dedicated to improving clinical outcomes and the quality of life for stroke patients. Perfuzze is developing innovative catheter-based technology to extract blood clots from the brain following an Acute Ischemic Stroke. We are located in the IDA Business Park in Dangan, Galway. Millipede technology has been recognised by the FDA through the granting of a Breakthrough Device Designation and was awarded CE Mark for its first product in 2021. At Perfuzze, we push the limits of what medical technology can do to help restore health and extend life. Our mission is to halve the number of patients who suffer disability post stroke treatment. We want to accelerate and advance our ability to create significant innovations, but we will only succeed with the right people on our team.

Our Culture

- An inclusive work environment, where all the employees are valued, supported, and encouraged
- All employees have a seat at the table and have influence
- A collaborative teamwork environment where learning is constant, and performance is rewarded
- The opportunity to be at the forefront of a technology that can positively impact the treatment of one of the world's most devastating diseases

Financial Controller Role

You will be a leader for the financial operations of our rapidly growing company. You will be responsible for management of the all accounting process providing technical accounting expertise and analysis and improvement of current financial processes. You must be a hands-on type of manager and should enjoy a fast-paced, start-up environment. Equally important to strong management skills, you must embrace change and the task of creating an infrastructure to support future growth as the Company expands. Although this role is based at our Dangan facility some hybrid working may be supported in accordance with company policy.

How You'll Contribute

- Responsible for all aspects of financial accounting at the Company, including financial procedures and controls, financial period close, budgeting and financial statement preparation and analysis
- Act as a resource across the business, delivering meaningful insight and financial decision support
- Responsible for the financial systems and infrastructure to scale with business growth and drive controls, efficiency and accuracy of all financial reporting processes
- Responsible for the Company's banking relationships, including cash management and investing activities.
- Manage the relationship with external auditors and financial consultants
- Responsible for US and international tax compliance

- Ensure that all regulatory reporting requirements are met
- Identify opportunities for process improvement and implement change to increase efficiency, streamline workflow and controls
- Prepare and present financial statements and monthly reporting package
- Prepare and manage all budgets and forecasts
- Work with the Board of Directors on financial strategy.

Must Have

- Fully qualified Chartered Accountant through the regular accounting bodies such as ACA, ACCA or CIMA.
- Strategic perspective – ability to integrate finance, business, human resources and legal perspectives into accounting and other decision-making in the company
- 10 to 12 years of progressive experience
- Advanced MS Excel and data management skills are critical
- Flexible and creative, with ability to learn new and complex concepts quickly
- Exceptional work ethic – ability to “roll up sleeves”
- Industry experience – ideally medical device/pharmaceutical with prior experience at a start-up strongly preferred
- Self-directed, able to manage time, handle pressure, multi-task and meet deadlines, independently and proactively
- Exposure to budgeting and forecasting
- Superior analytical skills combined with solid business judgment and communication skills
- Excellent oral and written communication skills and demonstrated leadership abilities
